

Notice to Mariners

No 22(T) of 2020

**Port of Southampton – Current Monitoring Surveys –
May 2020 - to August 2020**

Notice is hereby given that a total of two seabed frames will be deployed within Southampton Water at the locations indicated at Figure 1. Each of the frames will be mobilised with an Acoustic Doppler Current Profiler, (ADCP) system observing both currents through the water column and waves at the surface. Additional sensors will be observing water quality parameters such as temperature, salinity and turbidity. The frames will be on the seabed outside of the main navigable channels and stand 1.50m high.

This Notice will be cancelled once operations are complete.
